I'm a UX developer with 8 years industry experience. I've spent the last four years of my life in San Francisco building single page web applications. From an early stage start up to a publicly traded company, I have worked side-by-side with other designers, developers, product managers, and QA engineers to deliver consumer and B2B products. Now I am looking to relocate back to Seattle and join a team focused on building first class user experiences.

Points International | points.com | Sr. Web Developer
Nov 17, 2014 - present

+ Lead the implementation of Points.com, a SPA backed by a RESTful json api (Golang)
+ Built a full asset pipeline to support multiple apps (Node.js, Grunt and eventually Gulp)
+ Introduced a sane and scalable approach to managing our CSS (Sass, BEM naming conventions, ITCSS)
+ Migrated the application to use better tooling including ES6 modules (JSPM, System.js, Babel)
+ Added A/B testing to experiment with conversion improvement (Optimizely)
+ Promoted data driven decision making by integrating Google Analytics and custom event tracking

Switchfly | switchfly.com | Web Developer
Jun 2013 - Nov 2014

+ Developed a tool for travel agents to search and book hotel and air on behalf of clients
+ Built various web components focusing on reusability and simplicity (Ember.js)
+ Automated testing culture requiring developers to submit unit and integration tests with every PR
+ Strong focus on pair programming and agile practices with a development team of +20 people
+ Helped Improved dev workflow and tools by extending our Gulp pipeline
+ Participated in engineering seminars, hackathons, and lightning talks

Apartment List | apartmentlist.com | Web Designer
Jan 2012 - Feb 2013

+ Worked with the labs team to develop apps around the lead generation business model
+ Responsible for visual design and implementation of conversion funnel for autolist.com
+ Developed coding sensibilities and transitioned from web designer to front end developer
+ Gained experience building SPA-like apps (Backbone.js & Rails)
